**Bicycle cleaning
made easy**

**with the mobile
ReNewBike washing system**

The perfect solution for your customers in the areas

City & Municipality

Events

Hotel industry

Sports & Trade

Sustainable through low water consumption

The maximum water consumption is just three liters per minute. We attach great importance to sustainability and environmental friendliness.

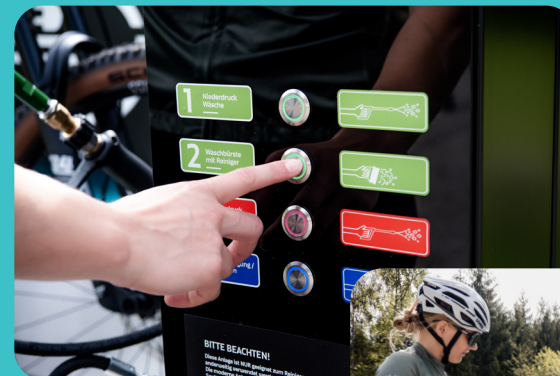

Decide for yourself about your components

The car wash not only serves as a central washing location, it is also characterized by its personalization and can be printed with your logo or customized in another way.

High-quality materials and well-thought-out Extras

- 100% high-quality stainless steel in the cleaning area
- Splash guard and dirt collection tray
- Only biological cleaning agents
- Water temperature: 50 - 55 degrees
- Optional compressed air and tire inflation system

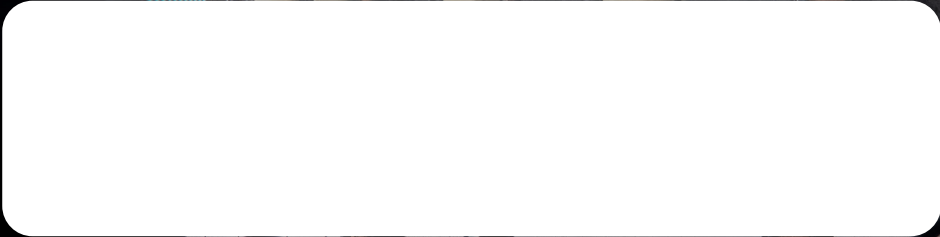

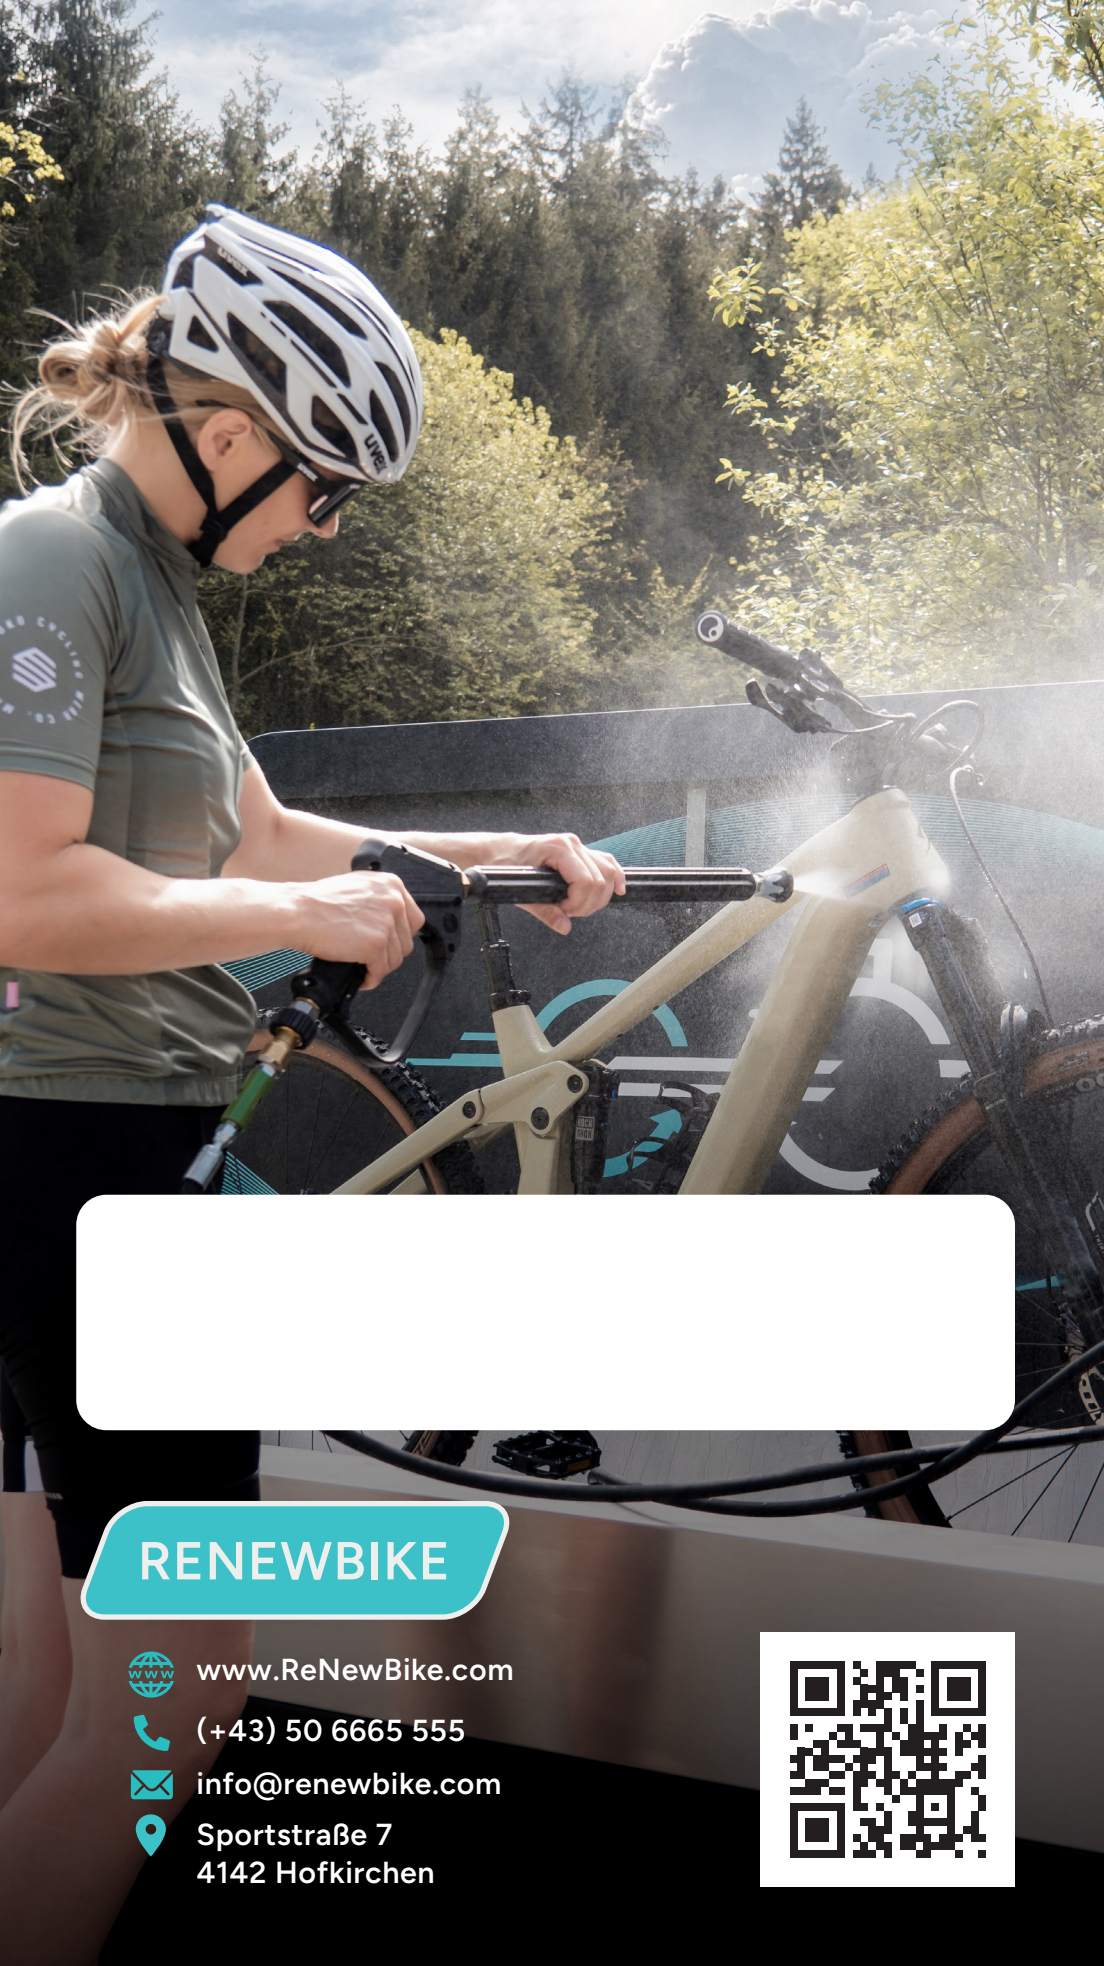

Growing need for cleaning options

More and more bicycle owners are looking for practical ways to clean their bikes without spending a lot of time and effort.

Easy operation

Our mobile bike washing system is not only easy to use, it also allows you to clean your bikes particularly efficiently.
